Introduction

Commercial law in Kuwait rests on a codified framework that governs traders, companies, contracts, and commercial papers, and it sits alongside Sharia principles, civil law, and specific regulatory regimes. Practitioners who know the code but not its application lose cases on procedure, jurisdiction, or form. This Advanced Foundations of Kuwaiti Commercial Law Training Course gives legal advisors, contracts professionals, and compliance officers a complete working method for that framework. Participants learn the commercial law structure, obligations and contracts, company law, commercial papers, insolvency, and dispute resolution before Kuwaiti courts and arbitral tribunals.
