Introduction

Understanding how equity and capital markets function is essential for anyone looking to enter the world of finance, investment, or trading. This comprehensive course offered by Gentex Training Center provides participants with a foundational grasp of how stock markets, capital markets, and financial instruments operate. Through a structured, practical approach, attendees will explore the roles of key market participants, market mechanics, regulatory frameworks, and trading strategies.

This training is designed to demystify core concepts such as initial public offerings (IPOs), market indices, financial statements, and the impact of global economic indicators on capital flows. Participants will gain hands-on exposure to market simulations, real-world case studies, and tools used by professionals to analyze equities and make informed investment decisions. The program is ideal for newcomers seeking confidence and clarity in navigating financial markets.

Equity and Capital Market Training for Beginners Course Objectives
