Introduction

The Forensic Excellence: Advanced Criminal Investigation and Evidence Management Training Course prepares investigators to run complex cases from first report to court. Strong investigations depend on disciplined method: a clear case theory, lawful evidence handling, and findings that survive cross-examination. This course develops advanced investigative capability and evidence management practice. It covers case strategy, scene and document examination, digital evidence, and interviewing. Furthermore, it applies evidence law, disclosure duties, and expert reporting standards. As a result, participants build case files that hold up under the hardest scrutiny.
