Introduction

Practical Use and Management of FIDIC Conditions of Contracts examines how project teams operate the FIDIC suite day to day rather than reading it in theory. This Training Course covers the Red, Yellow, and Silver Books in both 1999 and 2017 editions, the engineer's role, payment certification, variations, and claims. Participants study notice regimes, time bars, programme obligations, and dispute board mechanics. Furthermore, the programme connects clause wording to live administration through clause labs and scenario simulation. As a result, delegates leave able to run FIDIC contracts correctly from award to final account.

Practical Use and Management of FIDIC Conditions of Contracts Course Objectives

- Select the correct FIDIC book for each delivery model.
- Apply the 1999 and 2017 notice and time bar regimes.
- Administer the engineer's role, determinations, and communications.
- Manage payment applications, certificates, and retention release.
- Control variations, change orders, and price adjustment.
- Apply programme, delay, and extension of time mechanisms.
- Prepare compliant notices and fully detailed claims.
- Run the Dispute Adjudication Board (DAB) and DAAB processes.
- Handle termination, suspension, and employer's taking over.
- Build contract administration files that withstand arbitration.

Course Methodology

- Interactive workshops using real FIDIC-administered project files.

GENTEX® TRAINING CENTER

- Structured clause-by-clause labs on Clauses 1, 3, 8, 13, and 20.
- Notice and claim drafting exercises with time bar simulation.
- Payment certification and variation control practice sessions.
- Guided role-play of engineer's determination and DAB referral.
- Action planning that converts each session into a workplace commitment.

Who Should Take This Course

- Contract managers and administrators on FIDIC projects.
- Project directors, managers, and resident engineers.
- Legal counsel and claims specialists.
- Quantity surveyors and cost engineers.
- Planning and delay analysts.
- Employers' representatives and consultants.
- Contractors' commercial and site management staff.

Practical Use and Management of FIDIC Conditions of Contracts Course Outlines

Day 1: The FIDIC Suite and Contract Formation

- FIDIC Red, Yellow, and Silver Books compared.
- Principal differences between the 1999 and 2017 editions.
- Definitions, document priority, and interpretation rules.
- Particular conditions and special provisions drafting.
- Employer's and contractor's obligations and communications.
- Letter of tender, contract agreement, and securities.

- Building the contract administration plan and registers.

Day 2: The Engineer, Payment, and Certification

- Engineer's role, delegation, and determination duties.
- Employer's representative and communication protocols.
- Interim payment applications and certificate timelines.
- Retention, payment for plant, and materials on site.
- Employer's financial arrangements and evidence of funding.
- Late payment interest and employer's non-payment remedies.
- Records, measurement, and valuation rules.

Day 3: Variations, Programme, and Time

- Variation procedures under Clause 13.
- Value engineering and variation by instruction.
- Programme submission, acceptance, and revised programme rules.
- Progress reporting and progress measurement.
- Delay events, extension of time, and concurrent delay.
- Liquidated damages and delay damages.
- Testing, defects, and the Take-Over Certificate process.

Day 4: Claims, Notices, and Dispute Boards

- Contractor's claims under Sub-Clause 20.2 and the 28-day notice.
- Fully detailed claim requirements and time bar consequences.
- Employer's claims under Sub-Clause 20.3.
- Cost, delay, and quantum evidence standards.

- Dispute Adjudication Board (DAB) and DAAB procedures.
- Notice of Dissatisfaction and enforcement of decisions.
- Amicable settlement and arbitration referral choices.

Day 5: Termination, Risk, and Administration Practice

- Grounds and consequences of termination by either party.
- Suspension, care of works, and risk transfer.
- Insurance obligations and liability limitations.
- Record keeping, correspondence, and audit readiness.
- Practical contract administration templates and registers.
- Case review of FIDIC disputes and lessons learned.
- Personal action plan and continuous improvement.

Conclusion

By successfully completing Practical Use and Management of FIDIC Conditions of Contracts, participants will have acquired a practical command of the 1999 and 2017 FIDIC Books, payment and variation control, and claim and dispute board procedures. They will know how to operate the notice regime, draft compliant claims, and manage determinations and DAB referrals properly. In addition, the course prepares delegates to keep administration files that stand up in arbitration. As a result, they return to work ready to run FIDIC contracts with day-to-day confidence. Gentex Training Center delivers this Training Course with a practical, standards-based approach.

FAQs for the Practical Use and Management of FIDIC Conditions of Contracts course

Q1 What is the "Practical Use and Management of FIDIC Conditions of Contracts" course about?

It is a five-day programme that explains how to operate FIDIC contracts in daily practice. It covers the Red, Yellow, and Silver Books in both editions, the engineer's role, payment certification, variations, programme and delay, claims and time bars, dispute boards, and termination.

Q2 What are the key benefits of the "Practical Use and Management of FIDIC Conditions of Contracts" course?

Participants gain the ability to administer FIDIC contracts correctly, protect entitlement through disciplined notice, and prepare claims that survive technical scrutiny. They also learn to manage determinations, DAB referrals, and termination without procedural errors that forfeit rights.

Q3 What skills will I gain from the "Practical Use and Management of FIDIC Conditions of Contracts" course?

FIDIC book selection and clause interpretation, payment certification and variation administration, notice and time bar compliance with claims preparation, and DAB, determination, and termination management.

Q4 What tools, methods, or standards are covered in the "Practical Use and Management of FIDIC Conditions of Contracts" course?

The course covers the FIDIC Red, Yellow, and Silver Books in the 1999 and 2017 editions, Sub-Clauses 20.1, 20.2 and 20.3 notice and claim procedures, the engineer's determination rules, interim payment certificate timelines, retention and employer's financial arrangement provisions, Clause 13 variation procedures, programme acceptance and revised programme requirements, extension of time and liquidated damages drafting, Take-Over Certificates, the Dispute Adjudication Board (DAB) and DAAB procedures, Notice of Dissatisfaction rules, and ICC arbitration as the default referral route.

Q5 How is the "Practical Use and Management of FIDIC Conditions of Contracts" course applied in real-world practice?

Delegates apply it through contract administration plans, notice registers, payment applications and certificates, variation orders, programme submissions, delay analyses, claim submissions, determination replies, DAB referrals, termination notices, and final accounts. They also use it to train project teams on notice discipline and to prepare files for arbitration.
