Introduction

The Prep GRC Professional Certification (GRCP) Training Course prepares professionals to master governance, risk, and compliance practices used across modern organizations. Gentex Training Center designed this program to build practical knowledge of enterprise risk frameworks, internal controls, and compliance obligations. Participants explore key GRC principles, including COSO ERM, ISO 31000, and regulatory mapping techniques. Furthermore, the course strengthens skills in policy development, risk assessment, and audit readiness. As a result, attendees gain the confidence to align governance structures with organizational objectives. This Training Course combines theory with real case studies, giving participants practical tools to manage compliance challenges effectively across diverse business environments.

Prep GRC Professional Certification (GRCP) Course Objectives

- Explain core governance, risk, and compliance (GRC) concepts and terminology
- Apply the COSO ERM framework to identify and assess organizational risks
- Use ISO 31000 principles to design effective risk management processes
- Develop internal control structures that meet regulatory requirements
- Build compliance policies aligned with industry standards and legal obligations
- Conduct risk assessments using risk registers and risk heat maps
- Prepare for the GRCP certification exam through structured practice sessions
- Integrate GRC technology platforms into daily governance operations
- Design audit-ready documentation and reporting procedures for stakeholders
- Strengthen ethical decision-making within governance and compliance functions

Course Methodology

GENTEX® TRAINING CENTER

- Interactive lectures explaining GRC frameworks and international standards
- Case study analysis based on real business scenarios
- Group exercises on risk register creation and control mapping
- Practical workshops using GRC software tools
- Mock certification exams to reinforce learning and confidence
- Open discussions addressing compliance challenges and practical solutions

Who Should Take This Course

- Risk and compliance officers
- Internal auditors and control specialists
- Governance and legal professionals
- Corporate secretaries and board support staff
- IT and cybersecurity risk managers
- Finance and audit team members
- Professionals preparing for GRCP certification
