

PROJECT PORTFOLIO MANAGEMENT (PPM)

GENTEX[®]
TRAINING CENTER

Introduction

Effective project portfolio management (PPM) is essential for organizations aiming to align their projects with strategic objectives, optimize resources, and maximize value. Without a structured approach, businesses may struggle with inefficiencies, resource conflicts, and misaligned priorities.

Gentex Training Center offers a comprehensive Project Portfolio Management (PPM) course designed to equip professionals with the knowledge and skills necessary to manage multiple projects effectively. This five-day course covers essential methodologies, best practices, and tools to enhance decision-making and project selection. Participants will gain a deeper understanding of PPM strategies, risk management, and performance evaluation, ensuring they can contribute to their organizations success.

Project Portfolio Management (PPM) Course Objectives

- Understand the principles and frameworks of project portfolio management.
- Learn how to align projects with organizational strategy and business goals.
- Develop skills to evaluate, select, and prioritize projects effectively.
- Gain insights into risk assessment and mitigation strategies for project portfolios.
- Master resource allocation and optimization techniques to maximize efficiency.
- Explore key performance indicators (KPIs) and reporting methods for portfolio success.
- Learn how to use industry-leading tools and software to manage portfolios effectively.
- Enhance stakeholder engagement and communication across project teams.
- Understand how to balance innovation, risk, and profitability within a portfolio.
- Improve decision-making processes through data-driven insights and analysis.

Course Methodology

This course uses a combination of interactive lectures, real-world case studies, group discussions, and hands-on exercises to ensure practical learning. Participants will engage in scenario-based activities, portfolio simulations, and collaborative problem-solving sessions to reinforce key concepts.

Who Should Take This Course

- Project managers and team leaders seeking to manage multiple projects efficiently.
- Portfolio managers looking to improve selection and prioritization techniques.
- Senior executives and decision-makers responsible for strategic project investments.
- Business analysts involved in project feasibility and risk assessment.
- PMO (Project Management Office) professionals and consultants.
