Introduction

The smooth operation of any bank hinges on a robust risk management framework. This intensive five-day program, offered by Gentex Training Center, equips banking professionals with the knowledge and skills to effectively identify, assess, and mitigate operational risks within their institutions. Through a comprehensive exploration of key risk categories, internal control frameworks, and risk mitigation strategies, participants gain the ability to safeguard bank assets, ensure regulatory compliance, and contribute to a more secure and efficient banking environment.

Risk Management in Banking Operations Course Objectives:

- Master core principles of operational risk management in banking operations.
- Develop a comprehensive understanding of different operational risk categories (fraud, technology failures, human error, compliance breaches).
- Identify and assess potential operational risks using various risk assessment tools and methodologies.
- Implement effective internal controls to mitigate operational risks and ensure process integrity.
- Develop and implement a risk management framework for continuous risk identification, monitoring, and reporting.
- Understand the role of incident response planning and business continuity planning in operational risk management.
- Explore regulatory expectations for operational risk management in banking institutions.
- Enhance communication skills to effectively report operational risks and propose mitigation strategies.
- Analyze case studies and industry best practices to refine risk management strategies.

- Develop a personalized action plan for continuous improvement in operational risk management within their institutions.

Course Methodology

This interactive program utilizes a participant-centric approach that blends lectures, real-world case studies, group discussions, and practical exercises. Participants actively engage in risk identification simulations, internal control design workshops, and scenario planning activities. Through experiential learning and expert guidance from experienced instructors, participants refine their operational risk management skills, empowering them to contribute to a more resilient and secure banking environment.

Who Should Take This Course

- Banking professionals seeking to enhance their operational risk management capabilities.
- Risk management specialists, internal auditors, and compliance officers in banking institutions.
- Branch managers, operations personnel, and anyone involved in core banking activities.
- New hires in the banking industry seeking a foundational understanding of operational risks.
